

'Go down enough into anything and you will find mathematics'- Dean Shlicter

At kickstart Academy, the maths department are committed to providing a safe, inclusive and engaging environment that allows students to thrive from receiving high quality teaching through passion of the subject. We are a non-judgemental team who understand that every individual has a different level of prior knowledge and understanding and we endeavour to support each student to achieve to the best of their ability.

By studying Mathematics; students will explore real life problems and find solutions that will increase their confidence and passion of their own. Students will receive a tailored programme to improve their knowledge and self-esteem to tackle a range of everyday mathematical problems. Numbers are everywhere, students at kickstart will leave school feeling confident to go on to further education and the world of work.
